REVIEW

—We are team Nexus who aim to create a website for the betterment of various railway services.

DESCRIPTION

—How people across India are facing problems with the catering sanetization, in Indian Railways most of the people traveling in train, avoid to buy the food provided by the IRCTC because of hygiene problem and also the shortage of the variety available in the menu,well not only food but also for the luggages they have to spend so much time to find the Coolie in-order to take there luggages and also when we find one they ask money that dosen't worth it .There are also some cases when you fall ill during the journey and you cannot do anything as you haven't got the medicines with you .

Well not any more because we are bringing all this facilities with top class services all at one place .

CLIENTS

—We made a website so that our customers can avail our services for their ease and betterment.
—Some of our services are as follows:

COOLIE SERVICE

We understand your discomfort of not getting coolie at a reasonable price. Through our service, you can get coolie at the best affordable price.
Your conformability with our excellence

MEALS ON WHEELS

We make your journey memorable with our Flavours.
Your hygiene is our priority
We serve mouth-watering food here, you are just one click away from the menu of the most delicious food you can have to make your journey more beautiful

MEDICAL SERVICE

In case of emergencies like fever, loose motion, and all you can have medicinal support through our side. Our service allows us to provide you with basic medicine at your berth itself.
With 24/7 service we provide you with all kind of medicinal facilities

BUSINESS MODEL

- B2C Business model
- We provide services to the passengers with the help of vendors on our website
- Vendors can authenticate there service on our website and we verify it thouroly as per our T/C
- Vendors register to our website get there revenue as per there service
- We act as a medium between vendors and customers(passengers)
- We charge the vendors for the services they provide to our customers through our website

OUR MARKET STRATEGY

- *From the customer point of view ,they can enjoy all that they need for the journey at one place*
- *Market size for this website is huge as Indian railways carries approx 840 crores of passengers as per the yearly stats*
- *Why we are different ?*

  1.We provide all the services one need for the journey

  2.We have medicinal support and coolie assitance we is out of the box currently in the market.

  3.Proper hygien and sanetisation is our first priority

TECH STACK

HTML is a standard markup language for webpage we have you use HTML in our web-page to provide basic elements to our page

CSS ,SCSS describes how HTML elements should be displayed .We have used these style sheet language to style the HTML elements on our web-page

Bootstrap is used to make a responsive website. Use have bootstrap to build a fast and responsive website. We have used this to make our website mobile ready

Vanilla js is a name to refer to using plain JavaScript and JQuery is a library of javascript. We have used these two to traverse the HTML. The event handling, animation, and API are handled by this library.

Firebase

Firebase is a free cross-platform provided by google for a developer for maintaining a database and authenticate the user. We have use firebase to fully authenticate the credential of the user
